Setton RS 220. Built in 1977 by Setton (a partner or subsidiary of Pioneer), this uncommon receiver is said by some to have been designed by Pierre Cardin, who has dabbled in things other than clothing (but others say it was actually Allain Caire, an acolyte of Cardin).. This thing is a tank – well, more like a ' 50s Cadillac. I have fond childhood memories of playing with the controls.

Donald Norman is one of the greats of computer human interaction and user-centred design (he did, after all, coin the term) and his principles are a good place to start with any design project. But first, some context. Norman's main idea is that devices, things, computers, and interfaces should be functional, easy to use, and intuitive.

The reactionless control, or the reaction null space control, is a very special control approach that is designed only for space manipulators. The basic idea is to use the redundancy of the multi-body system to control the three-dimensional position of the end-effector without making any disturbance onto the attitude of the base.
